

Dear Parents/Carers,

Students in Y10 have recently completed their end of year assessments/Practice Exams. Now students have received their assessments back, we wanted to follow this up with some guidance on how you can support your child over the summer holidays with closing some gaps, ready for the new academic year, particularly as your child is moving to Higher in September.

Below is a table listing the current content not seen on Foundation, that Higher Tier students have seen prior to summer.

Your child will also be provided Worked Solutions for the Number Booklets and worksheets for these topics that they are to complete at home.

Topic	Sparx Code
Recurring Decimals	U689, U550
Surds	U338, U633, U872
Fractional and Negative Indices	U772, U985, U694
Error Intervals and Bounds	U657, U587

Furthermore, on the additional information shared regarding Y10 Summer revision students could also look at the Aim High content as optional revision. These include topics that are not on higher so your child will not have yet seen so if they are interested in getting a head start this would be the ideal place to begin. However, this content will be covered again in Y11.

If you require any further information, do not hesitate to get in touch.

Have a lovely summer.

Kind Regards

Miss H Hibberd

Y9 and Y10 Maths Coordinator
